### **Exploring Venus**

(This is ideal if you are new to astrology, as well as if you are a more experienced astrologer)

Bring your birth chart or send us your birth data ahead of time so that we can calculate the position of Venus in your chart.

Margaret will explore the psychological meaning of Venus in your life by sign, house and aspect. This includes Venus' role in helping you to connect with your inner self value as well as what you find of value and beauty in the world around you. We will also look at Venus' important role in relationships.

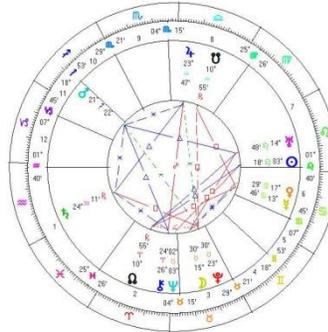

Christeen will explore, whether Venus is a Morning or Evening star in your chart - and what all this means for you. All of the above, together with aspects made to and from Venus' position in your natal chart reveal much about your ability to harmonise with the environment, your enjoyment and pursuit of the Arts and your relationship with money.
